A NOTE ON SOME URGENT PROBLEMS AND TASKS

-by Indrajit Gupta,
General Secretary.

Since the General Council has not been able to meet since October 1987, it would be useful to recall the main all-India tasks which we had formulated at that Calcutta Session in the then prevailing situation.

These can be briefly recapitulated as follows:-

(1) Ensuring mass participation by the trade unions, along with other mass organisations in the central rally at Delhi on December 9, to be followed by a countrywide Bandh to register popular protest against the Rajiv Gandhi Government's retrograde and anti-people policies (this took place on 15.3.88);

(2) Continuing, through the NCC, a broad based mass campaign demanding withdrawal of the proposed new labour Bills introduced in Parliament;

(3) Intensifying the struggle through the Public Sector Unions' Coordination Committee, for wage revision and broadly uniform new wage structures overcoming BPE's obstructive guidelines;

(4) Carrying forward the struggle against Government's policies of privatisation, dilution, dismantling and weakening of the Public Sector;

(5) Applying our collective experience and wisdom to the task of tackling the "T.U. movement's major headache", viz. the problem of "sick" industries, closures and prolonged lock-outs, and how to compel the Government to act against the private-sector employers through broad-based, industry-wise and State-wise mobilisations;

(6) Mobilising and organising the unorganised sector workers around the slogan of "A National Minimum Wage not lower than the poverty line level" - implementing our earlier decisions to hold central conventions in the non-coal mining industries and the building and construction sector - establishing regular and functioning liaison between the State TUCs and the BKMU branches;

(7) Mass campaigning among the workers against the growing menace of communalism and fundamentalism, with special

(B)

attention to Uttar Pradesh, Bihar, Rajasthan and Maharashtra, so that TUs are not taken unawares by physical attacks on national and class unity;

(8) Popularising the new Soviet peace initiatives, strengthening Indo-Soviet ties of friendship and cooperation, and mobilising the TUs, along with other anti-war and peace forces, against the US imperialist aggressive designs and conspiracies, especially in this region;

(9) Organisational:

- (a) = Extensive holding of T.U. classes based on the central syllabus - 2 central schools by AITUC in Hindi and English by beginning of January 1988 at Delhi, Hyderabad or Bangalore;
- (b) = Membership verification and affiliation dues;
- (c) = AITUC Building Fund;
- (d) = Punjab Solidarity Fund;
- (e) = Africa Fund (decision of 10 Central TUs);
- (f) = Improvement of T.U. Record and AITUC Samvad;
- (g) = Preparation for WFTU General Council meeting in New Delhi, November 1988;
- (h) = Holding of next AITUC Session;

Implementation:

Without attempting a detailed review, which is not practicable at this distance of time, it can be said that the AITUC Centre, the State TUC's, federations and unions have broadly attempted to work in conformity with the above tasks and guidelines during this period of 1½ years. However, the degree of implementation has been uneven and partial.

= Fulfilment of Task No.1 was successfully accomplished.

= As far as Task No. 2 is concerned, we have succeeded in getting the Government to postpone passage of the anti-labour Bills through Parliament, without, however, withdrawing them. They are kept pending and we have to remain vigilant. But the Bills in their present form, are not likely to be taken up before the next elections. The WFTU's intervention was useful in staying the hands of the Government.

= Task No. 3 has also been accomplished. Unity of the trade unions in the major PSUs overcame the BPE's resistance, and broadly satisfactory agreements were achieved.

(c)

A separate Chart on these is attached. Port and Dock workers had to resort to an all-India strike for 6 days before their wage revision demands were conceded.

= Task No. 4 is an up and down, ding-dong struggle. The privatisation offensive is going ahead. However, the resistance by TUs, backed by democratic support, succeeded in blocking Governmental plans for selling out Scooters India to Bajaj, and BEL-Taloja to Samtel and Corning. But this has also been due to the compulsions of this election year on the Government. The Approach Paper to the 8th Plan advocates also power generation and privatisation of such a vital transport sector as the airlines.

= Task No. 5 remains a continuing problem and should be thoroughly discussed in the present General Council meeting and appropriate decisions should be taken. A separate Note on Closures, Lock-outs and Retrenchment is attached to show the extent of the problem in its various aspects.

= Task No. 6 poses the responsibility of carrying out our responsibility for organising the unorganised sector workers - the call of the Bangalore Session 6 years ago. A number of minimum-wage struggles have been conducted and a number of sectoral conventions and demonstrations have been organised, including of working women. But progress is still slow and unsatisfactory.

= Task No. 7 was meant to make the anti-communal campaigning an integral part of day to day trade union activities. From this standpoint, we have failed. Now the issue has assumed the proportions of a national danger and the TU's have to act in the interests of their very survival as united mass and class organisations.

= Task No. 8 retains immense scope for more planned and regular T.U. activity which is at present consciously demonstrated on special occasions like September 1 and May Day.

= Task No. 9 - our performance is generally poor, except in respect of (d) and (g). Much depends on the initiative of the AITUC Centre, and the active cooperation of the State TUCs and General Council members. These are still lagging behind the requirements and opportunities.

(D)

The Rapidly Changing Industrial Scenario:

In the midst of our preoccupation with the struggle for better wages, the trade unions are being haunted by the spectre of massive job losses. Against the background of a vast reserve army of registered unemployed of nearly 40 million, the bargaining capacity of labour, and even its very means of livelihood, are shrinking as never before. This grim reality has to be faced squarely by us.

There is an alarming incidence of so-called industrial "sickness". At the same time, large sections of Indian industry are trying to transform themselves by their own version of "perestroika". The road to cost-effective production is being paved with the introduction of computerisation and hi-tech at one end, and sub-contracting and ancillarisation on the other. The argument of "high wages" to justify these measures is nothing but a bogey.

The official Survey of Industries shows that the rate of growth of wages is progressively declining - from 15.7% in 1979-80, to 12.4% in 1980-81, to 11.4% in 1981-2. And, as is well known, not more than 3% of cases of industrial sickness were due to high wages or labour unrest.

Of course, organised labour's back-to-the-wall stand is not due only to the new managerial offensive, particularly in the private sector. It is also aggravated by the low level of unionisation (not more than 30%), trade union disunity, and splintering of the working class.

While the average membership of unions in 1947 was 1,026, this figure fell to 602 in 1980 and 595 in 1982. The number of registered trade unions has risen from 2,766 in 1947-8 to 35,753 in 1980. Today, as against the combined membership of INTUC, AITUC, HMS, CITU, BMS and UTUC, a larger membership is claimed by other unions put together.

There is no doubt that the bargaining capacity of the trade union movement has declined. This is both an incentive for, as well as the consequence of, the employers' drive for restructuring their plants so as to cut down labour costs and increase productivity. But the management's basic attitudes towards labour are by and large still very feudal, and they are reluctant to put their cards on the table or even to talk to union leaders in good faith and with an open mind.

(E)

Government's attitude is no better despite Rajiv Gandhi's tall talk about modernisation. Shri K.G. Desai, head of the department of personnel management of the Tata Institute of Social Sciences, admits that "not only is there no clear national policy on the hows, whos and whats of technology, neither the Government nor the management has any conception of the implications of the technology they import. How can we assess whether it is appropriate for us? No real cost of feasibility studies are undertaken by industry before introducing these technologies in Indian conditions. Even worse, technology is casually introduced with not a moment's thought towards its impact on health."

As long ago as in 1969-70, the Gokhale Commission on computerisation had recommended four safeguards: no retrenchment, no reduction in wages, no adverse effects on service conditions, and sharing of the benefits of efficiency and productivity arising out of computerisation. This could well apply to other forms of modernisation also. But Government has done nothing about implementation of the Commission's recommendations, nor have the trade unions fought consistently or jointly for their applications.

Now that restructuring has become inevitable on a world scale, irrespective of varying economic systems, new guidelines are necessary. And we must think of new forms of struggle, since "militancy" by itself will no longer suffice.

How to fight back on a Policy level?

Narrow concentration on winning economic demands (especially in the organised private sector) is no longer producing results, particularly in industries where employers themselves want to close down/reorganise/diversify certain departments or processes, and to impose lock-outs, if necessary, to impose the new conditions on the unwilling workers and their unions.

Has this not been the common experience in the recent period in the textile and jute industries and prestigious companies like Metal Box, Bata, Guest Keen, Hindusthan Lever, etc.?

The issues involved are not just modernisation or reorganisation per se but a genuine fear of massive job losses as a result. Also, job profiles are going to undergo a change

(F)

with the services sector expanding, and existing manual jobs being replaced by skilled, highly skilled and technical personnel. This is more or less the pattern observed in all capitalist countries.

A key problem before us now is: in cases of lock-outs imposed as a coercive weapon to impose new conditions on the workers, how "flexible" (if at all) should be our attitude? How much "sacrifice" should the workers be prepared to accept in order to get the lock-out withdrawn and to keep the factory running? How do we assess the impact on:

- : earnings
- : workload
- : workers' health
- : safety at the workplace,

depending on whether the lock-out/closure is connected with modernisation, or simply imposed to effect a forcible reduction in labour costs? Degrees of resistance will vary in form and intensity, without, of course, conforming to any rigid formula. To this extent alone, can we speak of "flexibility" in trade union outlook and tactics.

An outstanding example of negotiated agreement (or conscious compromise) in the sphere of computerisation is that of the Banks. We should try to assimilate the experience of the AIBEA leadership in all its positive and negative aspects.

Wanted - a new tripartite Code:

The relentless logic of modernisation and restructuring prevents the trade unions from saying a blanket "No" to new technology and computerisation. But the managements, almost without exception, want to employ steamrolling tactics. Even the Tata Consultancy Services admits that "in India the management mainly take unilateral decisions - there are any number of cases where the management informed the unions about plans to introduce computerisation only after the gadgets arrived on the company premises".

The case for a new Code laying down agreed guidelines to cover proposed new changes of work methods/technologies/restructuring, to be negotiated and signed between representatives of Government, managements (both public and private sector), and trade unions, has become overwhelming. The AIPUC should take the initiative for launching a major

(H)

by all trade unions is being created by this capitalist development itself. The AITUC should stand at the head of a country-wide struggle for achievement of such a Code. Neither the Government nor the employers can frontally oppose it so long as they pay lip-service to ILO conventions and norms and to concepts of workers' participation in the task of raising productivity. What is needed is united mass pressure by the trade union movement to enforce such guidelines and safeguards as will curb the excesses of the employers and respect the workers' rights.

Concentrate on Unorganised Sector:

It is this sector, employing millions of men and women, which offers the best opportunities for the advance of the trade union movement in the developing countries. We neglect it only at our peril. Moreover, those units/small-scale industries which are more and more performing the functions of ancillarisation and contracting are acquiring a significance of their own as essential adjuncts to bigger industries. At the same time, the workers here remain the lowest paid and most exploited.

Numerous strikes and struggles for enforcement of statutory minimum wages, as well as for fixing a national minimum not lower than the poverty line standard, have been taking place, e.g. in Punjab, Maharashtra, Delhi, Haryana and other States.

Workers in Bidi, powerlooms, building and construction, non-coal mines, etc. have been on the move. A few meetings/conventions of working women have been held, and show their readiness to organise and agitate for their rights, economic and social. But, generally, the movement is still scattered and lacking in coordination and continuity.

Unionisation of agricultural labour is also lagging behind.

The main handicaps are failure to earmark cadre especially for the unorganised sector, and lack of adequate funds to cope with the organisational tasks.

It is high time we took some specific decisions, at both Central and State level to enable qualitative improvement of mass activity on this front. The General Council should come up with concrete suggestions.

(G)

policy campaign for such a National Code, whose component principles should include the following:-

(1) Trade unions must be consulted at every step on the necessity, appropriateness, and impact of changes proposed in work methods or of new technologies to be introduced;

(2) Every company/plant proposing such changes must obtain a "No objection" clearance from the trade unions concerned on the following terms and conditions:-

(3) The changes proposed will not result in retrenchment of existing workers, reduction in wages, or adverse effects on service conditions including health and safety;

(4) The gains arising out of improved efficiency and higher productivity as a result of the changes will be shared with the workmen;

(5) New jobs will be created to absorb the workers rendered surplus, and their planned redeployment will include necessary retraining at management/Government expense;

(6) Voluntary retirement schemes will be applicable only to those workers who have crossed the age of 50 years;

(7) Productivity norms will be worked out by agreement between unions and management, and workers will cooperate in adhering to them;

(8) New technologies to be introduced must have a social orientation, i.e. creation of new jobs, improvement of skills of those operating them, maximum use of indigenous resources, etc.;

(9) Imposition of lock-outs with the sole object of coercing workers into acceptance of wage-cuts, increased workload on existing machinery, cancellation of past gains, reduction in labour force, etc. must be prohibited by law, if not incorporated voluntarily in the Code.

Every trade union, irrespective of affiliation or ideology, should be interested in the achievement of such a tripartite Code at national level, because it serves the interests of all workers who are today under unprecedented attack in the name of corporate restructuring. The contrast with the perestroika of the socialist countries is striking. The objective basis for the broadest possible united action

Intensify the struggle against Communalism:

Generally speaking, our trade unions have yet to develop their independent mass campaigning against the communal forces which constitute a growing threat to the class unity of the workers. The outstanding exception is Punjab.

The recent spate of communal riots, coming in the background of the mounting tension over the Ramjanambhoomi - Babri Masjid "dispute", are a warning signal of Hindu-Muslim disruption especially in Uttar Pradesh, Bihar, Madhya Pradesh and some other Hindi-speaking States. It is essential that our trade unions should expose the game of the communalists and mobilise all sections of the workers through regular meetings, conventions, communal harmony marches, etc. to maintain peace and amity, and to organise union volunteer squads to patrol sensitive areas, keep a watch for rumour mongers and mischief makers. In the event of any disturbances breaking out, trade union activists should physically intervene and try to ensure that workers of one community give protection and shelter to workers of the threatened community.

The poisonous fundamentalist propaganda being spread among Hindus by the BJP, RSS, Viswa Hindu Parishad, Shiv Sena, etc. and by Muslim League, Jamaat-e-Islami, Ittehad-ul-Musalmeen and other organisations among Muslims is meant to drive a permanent wedge between the two communities. The working class cannot remain immune from its influence, especially where the trade unions have traditions and habits of narrow "economism". It is, therefore, essential to activate the leading cadres, and develop their political consciousness to make anti-communal campaigning a regular part of day to day T.U. activity.

Example of our Punjab trade union comrades should be propagated widely to inspire workers in other areas and give them the confidence that the organised working class can be kept out of fratricidal strife.

The Shiv Sena led by Bal Thackeray has become a powerful force for communal disruption especially in Maharashtra, with its open appeal for a Hindu religion. It tries to antagonise and intimidate Muslims, Sikhs and Dalits alike. It propagates its line both from the platform of its own trade unions as well as inside unions led by others. If this menace is not consciously exposed and countered by at least the Left-led unions, the class outlook of the movement in Maharashtra will be pushed further and further back.

The regional political parties which have come up in recent years have formed their "own" trade union wings as, for example, the DMK, AIDMK, TDP, etc. Their attempt would be to explain away problems of unemployment, low wages, etc. in terms of regional "backwardness", due to discriminatory treatment against their States, thereby rousing the workers, not against the socio-economic system and the need to change it, but against people of other States. This can be a dangerous game, pitting one State against another and pandering to chauvinist sentiments.

Similarly, associations and federations of Scheduled Caste and Scheduled Tribes employees are springing up, especially among Government employees, with grievances directed against other castes. Organisations based primarily on communalism, casteism, or regionalism will obviously weaken the movement as a whole. Legitimate grievances should be taken up by our unions in a democratic way, so that the aggrieved sections do not feel neglected and their sentiments are not exploited in a distorted and disruptive way.

Apart from independent, anti-communal campaigning, our trade unions should fully cooperate with all other secular and progressive forces in joint rallies, conventions, padayatras, etc.

.....

DEVELOPMENTS AND WORK SINCE THE LAST GENERAL COUNCIL

The period under review has been a period of offensive by the employers and the Government on the rights and employment of the working class and mighty united struggles against such policies and for upward revision of wages.

Public Sector:

The public sector workers held a workshop and decided to submit memorandum on demands on common lines. The demand raised was for Rs. 1500 pay at 600 Index.

After the Fourth Pay Commission was implemented, on the direction of the Supreme Court Mishra Commission was set up to recommend pay and allowances for the industries that were following the Pay Commission Pattern. The Government declared interim relief for the supervisors and the executives.

The B.P.E. issue guidelines that the increase in wages in the public sector should not be more than ten per cent of the wage bill.

The public sector workers held a Convention on 29th January 1988 and planned action. This forced the Government to sanction interim relief but not the consequential benefits. Further interim relief was not sanctioned to the workers in West Bengal and also to such of the P.US whose agreement was still in operation.

The public sector workers went on strike throughout the country on 14th, 15th and 16th March 1988 and the coal workers went on strike for six days upto 20th March demanding immediate settlement of their demands. More than a 1000 miners were arrested, and police terror was let loose particularly in Madhya Pradesh and Bihar including firing in three cases.

Subsequently the workers were given HRA and C.C.A on interim relief and those who were not given interim relief were also sanctioned from a later date. But the B.P.E. stressed that this amount shall be recovered after the wage agreements. The B.P.E. also issued guidelines that the wage should not be increased beyond 12½ percent

if the agreement is retrospective and 15 percent if it is prospective. Against this the public sector workers held a Convention on 28th May 1988 and decided to fight out the directions of the B.P.E.

The national workshop on Dearness Allowance was held on 18th and 19th May 1988, which demanded full neutralisation with a minimum of Rs. 2.50 per point.

There was a workshop on wages at Delhi too to work out common approach in view of the agreements reached in D.V.C. and Indian Airlines. An extended meeting of the C.P.S.T.U. was held on 12th, 13th December which gave a call for observance of a week from 17th to 27th January 1989 and to prepare for strike.

After failing to enforce the B.P.E. guidelines the managements were forced to restart negotiations and M.O.U.S. have been signed in Oil, Steel, Coal, BHEL and the Bangalore based industries. The workers have in general achieved an increase of around Rs. 100.00 in addition to the interim relief and other allowances or fringe benefits paid have not been deducted. For the first time Pension schemes have been agreed to subject to the approval of the Government.

This time there is improvement in coordination in the public sector unions of A.I.T.U.C. and also better functioning of the C.P.S.T.U. The functioning should be more organised and there should be greater coordination in future.

The public sector employees in West Bengal went on strike from 23rd November 1987 and got the interim relief. The strike lasted 35 days and they won interim relief on a flat basis. The strike in public sector jute lasted longer.

In spite of agreements in several public sector undertakings the Minister for Port and Dock and the managements were adamant. There was a complete strike in all ports from 17th April 1989 and after six days an agreement was reached and the strike withdrawn.

Mishra Commission

The Government has not taken any decision on the recommendations of Mishra Commission, because according to Government sources this will involve an expenditure of Rs.200 crores and if the same benefits are extended to the supervisors and executives of all public sector undertakings the expenditure according to Government sources shall be around Rs. 2000 crores. This means that the Government accepts that the supervisors and executives in the public sector undertakings are being paid far less than their counterparts in the Government departmental undertakings.

Bank, L.I.C. and G.I.C.

The Bank employees got a Minimum Pay of Rs. 900 at 600 points, higher incremental rates, cent percent neutralisation upto a higher level including for the staff and stagnation increments. An interesting aspect of the struggle of the Bank workers was that B.F.F.I. went to court seeking adjudication and not Bipartite Settlement. The court however threw out their petition. 7 lacs Bank workers went on a one day strike for their wage demands. Similarly the L.I.C. and G.I.C. also were able to settle their demands after hard fought struggles.

Index Fraud:

Inspite of opposition by all trade union centres the Government has introduced the 1982 series which is based on an unscientific basket. Already it is noted that in some cities the Index has gone down while the actual prices are up. The Government has stopped publishing the Index on 1960 base which in comparison would have exposed the fraud that is being played and that the Government wants to conceal the price rises.

The A.I.P.U.C. alongwith the other mass organisations with left orientation such as C.I.P.U. the Kisan, agricultural labour, youth, students and women's organisations participated in the campaign on mass issues of the people, participated in the March from Trivandrum and other centres and in the one million strong rally at New Delhi in front of the Parliament. The left parties gave a call for Bandh on 15th March demanding stepping down of Rajiv Gandhi.

The A.I.T.U.C, C.I.T.U., H.M.S., U.T.U.C and others gave a call for general strike to protest against the anti-people policies of the Central Government and there was a wide response.

Closures and Amendment of Labour Laws:

The industrial sickness increased very rapidly after announcement of concession for sick industries. The mandays lost due to lockouts were far exceeding the mandays lost due to strikes.

On 21st December 1987 an all India Convention against closures was held and a protest day against closures was observed on 18th April 1988. This movement will have to be carried forward. A detailed note on the subject is appended in the papers.

The Black Bills:

The Government already passed an amendment of the definition of Industry in the Parliament but it is not yet implemented.

The Government hurriedly passed the Hospitals etc. redressal of grievances bill in Rajya Sabha and finally moved amendments to the Industrial Disputes Act and the trade union Act. These legislations meant an attack on right to organise, right to collective bargaining and right to strike and would introduce check-off system which is opposed by all trade union centres except the INTUC. These also provided penal provisions for violations. Hence the Industrial Disputes and the Trade Union Act was termed as the Black Bill.

A National Convention was held against the Industrial Relations Bill, on 14th July 1988 and rallies and demonstrations and ^{courting of} arrests were held before the Parliament and Assemblies on the opening day of the Parliament on 27th July 1988. The Convention also gave a call for strike on the day the Bill is introduced in the Parliament. Five Labour Ministers of State Governments came out against the Black Bill.

The W.F.T.U. sent a protest telegram against the Black Bill. The Bill has not been moved so far. It shows

that it is possible to beat back the offensive of the Employees/Government if the working class takes up an united determined fight.

Against Privatisation:

There was a big agitation against sale of Scooters India of Lucknow a public sector undertaking to Bajaj. The agitation was marked by Dharnas, Jail Bharo, strike and was widely supported by other sectors of the workers. The agitation still continues.

The workers of Bharat Electronics throughout the country went on a days strike against the decision of the Government of India to give majority shares of the Taloja unit to an American firm and its Indian subsidiary. Because of agitation the deal was kept in cold storage. But some of the state Government's like the Andhra Pradesh are going ahead with privatisation. The Allwyn Nissan has been handed over to Mahindra & Mahindra and the A.P. Scooters to Bajaj.

Textile:

The New Textile Policy which allowed liberal imports of synthetic fibre, and export of yarn ignoring the demands of the handloom sector, of trying to merge the N.T.C. Mills etc. has led to more closures than before, adversely affecting the plight of the powerloom workers and lack of yarn and market for the handloom workers. Tens of thousands workers in the Textile Mills have been thrown out of employment. Even the employers have stated that the policy has failed.

Government of India has appointed a Textile Review Committee but has included representatives of INTUC and N.L.O. alone on the Committee.

An all India Convention of textile workers, was held at Kanpur on 9th October 1988 which was attended by 256 delegates. The Convention held the restructuring should be done without loss of employment. The N.T.C. should not merge the mills and should not close any mills, the textile industry should be nationalised, the workers in the Powerloom sector should be assured Minimum Wages and implementation of other Labour Laws and yarn at subsidised rates should be provided to handloom workers and market assured and lastly the cotton growers should get remunerative prices.

Save Textile Industry Day was observed on 21st November 1988.

The textile workers submitted a petition to the Parliament on 5.12.88.

The textile workers of Kanpur resorted to the Rail Roko for 197 hours which forced the Government to withdraw the notification on the basis of Tribunal's judgement which permitted retrenchment of 24,000 workers. The A.I.T.U.C. took the initiative and played an important role in the struggle.

The Sugar Workers went on a countrywide strike on 15.12.89 to protest against the recommendation of the Wage Board which rejected most of their demands and which suggested cent percent neutralisation with the result that the lowest paid worker will get Rs. 1.45 per point instead of Rs. 1.65 per point which he was getting.

Earlier the Sugar workers went on strike on 19th Dec. 1987 demanding wage revision. Sugar workers organised a Dharna on 11.4.1989 at Boat Club and submitted a petition to the Lok Sabha Speaker demanding a rejection of the Report.

The all India Convention of Cement Workers on 3rd April 1988 demanded scrapping of the Arbitration. Out of two man Arbitration Board one is the President of I.N.T.U.C. and only the memorandum of I.N.T.U.C. has been referred to it. After the collapse of the Arbitration Board, the INTUC federation

The N.P.C.C. Workers are conducting their Dharna for over two years. Number of Trade union leaders were victimised. But they are putting up a dogged fight undaunted. It is a question of security of service and the service conditions for which this dogged agitation is on but the Government is adamant and does not negotiate. There was 3 days All India strike and Demonstrations at all district Headquarters.

The Central Government employees agitated for second Interim Relief earlier - now on 29.1.89 they organised a Dharna demanding release of D.A. instalment and other demands. Supreme Court has given a judgement for equal pay for equal work and for regularisation of contract labour.

There have been several strike struggles during this period and some of the major strikes were:

The strike by the workers of Heavy Engineering Corporation.

Public sector jute workers strike of West Bengal from 14.12.87 to 24.2.88 which led to increase of around entered into an agreement with meagre benefits.

Rs. 50. The indefinite strike call given in other jute mills was to commence from 26th February 1988 but a settlement was reached on 25th February and the strike was called off.

The 45 days strike in Engineering Industry in West Bengal ended on 10.1.88 after an agreement was reached on revision of wages and D.A.

There were numerous strike struggles in Goa particularly against closures.

Eleven days strike of Singareni Collieries workers was called off after time bound agreement on permanency of Badli fillers, abolition of contract system in certain sections and promotion to next higher grade after seven to nine years in various categories was agreed.

Recently while the national level agreement was reached the radicals attacked the A.I.T.U.C. led union offices in Godavari Khani and Bellanpalli led a strike under threat for some days on the false plea the national trade union centres are delaying agreements.

There were strikes by the Government employees in Rajasthan, Uttar Pradesh, and Bihar in which the A.I.T.U.C. played an important role.

The college teachers throughout the country went on strike for common U.G.C. scales and proper grades and promotion channel.

The Bihar and Orissa teachers went on strike during the period under review.

There have been wage settlements in Greaves Cotton where the Minimum Wage is agreed at Rs. 2024.60 at July 1987 Index.

Similarly an agreement is reached in David Brown Greaves and Rs. 2190 as in June 1988 excluding of D.A. which is Rs. 500 to Rs. 650.

The AITUC affiliated union got recognition in Visakhapatnam Steel Plant securing 1551 votes as against 800 votes by INTUC, 170 votes by H.M.S. and 75 votes by CITU.

As per the call of the Working Committee month of June 1988 was observed as Punjab Month to mobilise public opinion against the fundamentalists and terrorist forces and for

unity and integrity of the country.

The AITUC submitted a memorandum to the Planning Commission opposing the economic policies of the Government which gives concessions for the M.N.C's and the monopolists and leads to attacks on the working people. It should be noted that the value added per worker has increased.

A trade union committee inclusive of all Central Organisations including the I.N.T.U.C. was formed against Apartheid. The Coalminers throughout the country donated one day's wages and some more funds were raised from other trade unions for Africa Fund. Nelson Mandela's Birthday was celebrated.

1st September was observed as 'Action for Peace' day throughout the country.

Bihar earthquake relief fund was raised.

A consultative meeting of Soviet and Indian trade unions was held for further cooperation.

A delegation of AITUC led by Comrade Indrajit Gupta, General Secretary, Comrade Homi Daji, Secretary and others visited China on the invitation of the Chinese Trade Union Federation and had exchange of experience and agreed to further strengthen the ties.

The General Council meeting of the World Federation of Trade Unions-WFTU was held at New Delhi from 24th to 28th October 1988. The W.F.T.U. has given a message to the workers in India ^{which} / states, "WFTU has always been with the trade unions and working class of India in their sustained struggle in defence of working class rights, for betterment of their living and working conditions and for defence of national sovereignty and unity". "The General Council reiterates its fraternal solidarity with the workers and trade unions of India in their struggle against reactionary forces seeking to destroy the unity of the working people as well as national unity and wish them success in their struggle to build a better life upholding peace, democratic advance, and social progress."

A petition of the working women to the Parliament has been drafted and already translated into some of the languages. Signatures should be collected from working women and the demands there in should be popularised.

Already meetings have been held at some of the working class centres and the representative from the AITUC Centre attended. The Maharashtra Working Women's Convention was held in Bombay. Similarly, a Convention of the employees in Anganwadis was held.

Unorganised Sector:

The Beedi workers of Madhya Pradesh organised a demonstration and offered Satyagraha in front of the Vidhan Sabha. They have secured an increase in the rate from Rs. 10.50 to Rs. 14 per thousand beedis.

3000 contract labourers of Balco and its Pukhtapur Mines organised gherao, dharna and a fifteen days strike. The movement got support from the permanent workers also and ended successfully.

Contract labour of N.T.P.C. in Sidhi district conducted a militant movement.

1000 Iron Ore Mine contract workers of Bhilai in Durg went on 9 days strike and negotiations commenced.

During this period the contract labour in various parts of the country are getting organised.

The unorganised workers are in large numbers and are below the poverty. It is necessary that all the AITUC organisers and the leaders of the organised Industry devote attention to organise the unorganised. Some all India campaigns need to be taken upto implement the task of "organising the unorganised".

Trade Union Schools:

A trade union school for women activities in Maharashtra was organised.

In January 1989 trade union schools were organised two in Delhi, one each in Bangalore and West Bengal and one by the Electricity Federation in Madras.

.....

N O T E O NLOCKOUTS, CLOSURES, INDUSTRIAL SICKNESS AND RETRENCHMENT.

Lockouts: The Mandays lost due to lockouts during the last three or four years are more than the Mandays lost due to strikes which is clear from the following figures:

MANDAYS LOST IN MILLIONS

<u>Year</u>		<u>Due to strikes</u>		<u>Due to lockouts</u>
1984	-	39.26	-	16.07
1985	-	11.49	-	17.75
1986	-	18.82	-	13.92
1987	-	14.03	-	21.33
1988	-	9.37	-	13.73

(Jan. to Oct.)

It is clear that in 1985, 1987 and 1988 in mandays lost due to lockout far outstrip the mandays lost due to strike.

It should be noted that the mandays lost due to lockout in West Bengal alone are more than 50 percent of the mandays lost throughout the country and second comes Maharashtra i.e. the big and old industrial centres of the country.

MANDAYS LOST DUE TO LOCKOUTS (IN THOUSANDS)

<u>State</u>	<u>1985</u>	<u>1986</u>	<u>1987</u>
All India	17,753	13,925	21,452
West Bengal	10,770	8,101	12,747
Maharashtra	2,868	2,105	2,759
Tamilnadu	908	1,098	688
Bihar	186	132	1,673
Uttar Pradesh	107	386	946
Gujarat	379	541	710

One of the features is that there have been prolonged lockouts even in industries which cannot by any imagination be termed as sick units or the ones having obsolete machinery such as Bata, Hindlever, Phillips, Kesoram Cotton etc. The main purpose was to force the workers to accept inferior conditions of service by way of reductions of wages or freezing of Dearness or reduction in the number of workers, increased workload etc.

Industrial Sickness

The Industrial Sickness is growing very fast specially since last five year when the Government announced certain concessions to the sick units.

	<u>Large</u>	<u>Medium</u>	<u>SSI</u>	<u>Total</u>
December 1980	409	992	23,149	24,550
December 1986	714	1,250	1,45,776	1,47,740
June 1987				1,58,226

In June, 1987 sick industries in some of the States were:-

Tamilnadu	-	25,146
West Bengal	-	18,129
Andhra Pradesh	-	14,064

(Lok Sabha 12, Aug. 1988)

Out of the Bank funds locked up in sick industries Rs.4422 crores are locked up in 689 large and 1,28,684 small scale units.

LARGE SCALE UNITS

<u>State</u>	<u>Units</u>	<u>Amount locked</u>
Maharashtra	151	898-54
West Bengal	150	758-22
Gujarat	66	332-20

		1988-96

This means almost 45 per cent of the amount is locked up in large scale industries in the above three states which are the old industrial centres of the country.

Out of the large industries i.e. whose Bank Credit limit is Rs. one crore. and above.

<u>Large</u>		<u>Bank outstanding</u>
1985	597	Rs. 2655.39 crores
1986	689	Rs. 3238.64 crores
Out of these large units		
	<u>1985</u>	<u>1986</u>
Textiles	162	185
Engineering and Electrical	153	175

Out of these Banks considered 374 as viable and 224 non-viable. Viability of 91 was yet to be decided.

VIABILITY STATUS: DECEMBER 1986

<u>Units</u>	<u>Number</u>	<u>Amount in Rs. Crores</u>
Viable	17,708	2167.88
Non-viable	1,27,719	2421.84
Viability yet to be decided	2,313	284.77
	-----	-----
	1,47,740	4874.79
	-----	-----

Governor of Reserve Bank stated that major cause of sickness are obsolescence of plant and machinery lack of managerial skill, shortcoming in project planning and implementation and delay in financing were some of the major problems.

The Governor of Reserve Bank further pointed out that there is failure to rehabilitate because of tendency towards over-emphasis on financial reliefs without paying due regard to improvements in managements stake in the unit.

The situation may have variations from industry to industry and area to area.

Andhra Pradesh has entered late in the industrial field and the report of a Committee appointed to study industrial sickness examined 321 companies which revealed the major factors responsible have been working capital problem (104 cases) dispute between Partners (35) disinterest of the entrepreneurs (33) and marketing problems (20). It is also noted that labour problems are not the cause of sickness.

The report further observed, "since the Government of India announced certain concessions for the sick industries with a view to bring them back to health the incidence of sickness has suddenly increased from 1987. The report states, "some of the factors underlying the industrial sickness a charge that industrial sickness has become a profitable business, in the light of the various relief measures that are available."

TEXTILES

It is a fact that Cotton and Jute Industry are facing problems due to synthetic fibre, the problem of outdated and old machines, and diversion of capital from these industries to the other sectors which provide greener pastures than these such as Chemical, Pharmaceuticals, Plastics, Engineering, Hotel, Film and real estate business etc.

In June 1985, 70 textile mills were lying closed with 94,297 workers rendered jobless and in September 1987 there are 127 closed mills with 1,66,000 rendered jobless.

At the end of 1988, as many as 138 textile mills were closed rendering 1.85 lakh workers jobless.

In Bombay alone the number of Textile workers rendered jobless is about 82,000 with another 50 to 60 thousand Badli workers thrown out.

Specially after the announcement of the new textile policy there is cut throat competition from Powerloom Sector. The big Industrialists have taken over large number of Powerlooms because of the low cost of production. There are no overheads, wages are low, there is evasion of Taxes and Labour legislations and hence the profit margin is very high.

The labour cost difference between the Mills and the Powerloom Sector per worker per day is around Rs.65/-. The handloom sector is suffering because of the high price of yarn and shrinkage of market.

There is growing competition from Japan, South Korea, Hongkong and Singapore etc. Earlier there was smuggling and now with the liberalisation of imports there is open competition. About 50 per cent of the Handlooms are lying idle.

In this situation N.T.C. which owns 127 mills is planning to convert its Mills into Spinning Mills and either merging the loosing units or closing them. The N.T.C. is prepared to give looms free if the workers form cooperatives.

There has been neglect of modernisation in time and thoughtless modernisation now.

At present 138 textile mills are lying closed and Tamilnadu tops the list with 39 (42 as on 27 February '88) and out of these 87 mills involving 112,000 workers were closed after declaration of new Textile Policy. Another 90 to 100 mills are waiting in the wings to shake off.

JUTE INDUSTRY

With 10 of the 56 functioning Jute Mills in West Bengal closed and several others running in unusual circumstances the 2.25 lakhs Jute workers are again in a predicament.

One after another the Mills are being locked out. The lockout figures in Jute Mills, vis-a-vis production figures indicate that the Jute employers kept the total production figures almost stable though about 25 percent of the capacity remained idle during 1989.

There is arbitrary change in men machine ratio reducing employment potential.

Some of the Mills which were under lockout for several years have been purchased by speculators and raw jute traders. The new employers are forcing the workers to accept reduced wages and increased work-loads. Some employers are bringing pressure on Jute and other workers to accept reduced wages. The industrialists failed to overcome the crisis and speculators have entered for profits and not production.

The Government of India's belated orders for mandatory use of jute goods in packing in some areas like Cement, Fertilisers, Foodgrains, Salt, Sugar etc. have been challenged in the Supreme Court. Could change of consumption pattern be prevented by an ordinance?

The Centres order for manufacture of bags of jute and synthetic combined have posed serious problem to Jute industry. In such a situation all the workers cannot be absorbed.

Some signs of improvement in domestic and foreign market of goods are perceptible but the basic problem remains the same.

It has been admitted by the West Bengal Government that the spate of lockouts and suspension of work etc. resorted to by the employers had sharply increased in 1988.

The Labour Department review states, "The employer in general had been trying to force the workers to accept derogatory terms of employment like reduction in work force, moratorium on wages, even actual reduction in wages in certain cases, freezing of dearness allowance, curtailment of other existing benefits so long enjoyed by the workers, imposing of higher work-loads arbitrarily. Worse still some of the

employers are trying to impose wages less than that fixed in the tripartite settlement, making major concessions like giving a portion of their money accumulated in the Provident Fund as loan to the owners."

Lockouts and suspension of business were found to be designs of the employers extracting financial concessions from various institutions and in various forms. The earned wages in some cases are not paid, E.S.I. and Provident Fund contribution is not paid and when factory is closed gratuity and the retrenchment compensation are either not paid or paid in instalments.

The employers press on the workers to accept derogatory terms on the plea that it is required to get loan from financial institutions. In reality financial institutions do not advance further loan unless it is made out that the unit can become viable.

Another feature is the non-renewal of notifications issued under the industrial (Development Regulation) Act by the Central Government in respect of some of the industries. Thousands become unemployed. The Government of India is going ahead for outright closure of some of its establishments in West Bengal. The problem is of non-viable units also.

In Andhra Pradesh, the A.P. Scooters, a State Government Undertaking was sold to Bajaj, the Allwyn Nissan to the Mahindra and Mahindra and the management of the Sirsilk a State Unit is taken over from Birlas and is lying closed for two years. The State Government states that it is not the responsibility of the Government to enter into economic activity. It doesn't provide necessary funds and a number of Spinning Mills in the Cooperative Sector are lying closed. In D.B.R. textiles in the Industrial Development Bank is prepared to advance loan for modernisation but wants the state Government to be guarantor which it is not prepared.

In key and basic industries the trade unions can insist on nationalisation. But if the Government nationalise junk after the Milch Cow is dried up can the Government run it? Will it not be proper for the Government to start a new industry and absorb the workers who are thrown out? There are 30 million unemployed in the country and large number who were employed are being thrown out due to industrial sickness or due to modernisations, etc.

Apart from these there are also Engineering units which have obsolete machinery and were closed by the employers. The Government by notification took over the management and now does not intend to renew the notification.

The Steel industry is being modernised, but the Government has declared that by providing suitable training the workers shall be absorbed. Yet the contract labour is being rendered unemployed.

Thus the workers are faced with the problem of lock-outs to force them to accept cut in wages, freeze of dearness allowance or retrenchment.

There are industries which are sick and the managements are trying to pass on the burden to the workers instead of finding methods of reviving them to health.

The problem of replacement of obsolete machinery is there and prevention of sickness by proper monitoring.

The New Textile Policy has done harm to the workers, to the workers in the powerloom and the handloom sector. The Government has set up a Review Committee with only limited representation of labour on it.

In the jute industry the funds allotted for modernisation have not been utilised. The Consumer demand has changed. The jute employers are averse to make any investment in the industry for its improvement.

In such a situation the workers in a number of units are resisting to accept wage reduction or retrenchment. But in some units they have been forced to accept golden hand shake, or freezing of D.A. or reduction of wages, depending on the position of the industry and the capacity to fight back.

In Kanpur the workers resorted to Rail Roko programme for 107 hours and forced the Government to withdraw its notification which authorised the managements to retrench 24000 workers.

The Kanpur Conference of the Textile workers stressed that restructuring of the industry is necessary but it should not lead to loss of employment. The Government should ban lockouts which are meant to force the workers to accept reduction in their emoluments and for inferior conditions of

service. The Government should see that all the viable industries are opened and necessary steps should be taken for that.

Wherever the Government is required to takeover a sick industry it should also takeover the profit making industries of the same group.

In the case of restructuring and modernisation efforts should be made for simultaneous expansion so as to absorb the surplus labour.

In the alternative new industries should be encouraged and those who absorb the labour thrown out should be given incentives.

The Trade unions should be associated with Planning. The trade unions should be associated with the Committees that study the problems of particular industry.

United and militant struggles should be conducted against attacks on the existing facilities and unfair practices of the managements, which the managements try to impose through lockouts and closures. While conducting such struggles the unions in each case should study the position concretely understanding the mood and fighting capacity of the workers and adopt appropriate tactics.

There is an effort to pass on the sick industries to the shoulders of the workers. The Supreme Court in the case of Kamani Tube has upheld handing over of the Industry to the workers cooperatives.

The Milch Cow shall be with the capitalists and when it gets dried up the workers are called to nurse it and maintain it. The Andhra Pradesh Government has prepared a legislation by which the Government shall be authorised either to transfer a sick unit or 'its' management to the workers cooperative. The Government will give certain concessions in interest rate and also restructure the loan but the workers cooperative shall be required to clear all the liabilities incurred by the previous employer. Further the cooperative is expected to compete in the market for its survival. The cooperatives in most cases are bound to fail adding to the misery of the workers. But the Government will then gleefully say, "It is the workers who failed."

The Andhra Pradesh Chief Minister has publicly stated that the state shall not get involved in economic

activity. On all sides it is being recognised that due to sickness or due to modernisation or due to obsolete machinery large number of workers are being thrown out of employment.

The G.I.C. has prepared a scheme to provide relief in such cases and the same is with the Government of India.

The Andhra Pradesh Government has prepared a contributory scheme, because of which apart from the existing legal benefits a worker shall be paid a Minimum Wage during the first year, fifty percent of the wage during the second year and 25 percent during the third year.

Similar scheme was also announced for the workers of textile mills.

The trade unions have to work out a common programme to deal with lockouts meant to attack the workers benefits, the problem of sick industries, reopening of closed industries, modernisation and absorption of labour thus thrown out of employment. If the labour remains out of employment the relief he is entitled to and also proper policies for absorption.

In West Bengal, AITUC Federation of jute workers have launched direct actions by way of road block and rail block.

Trade unions have to fight back the offensive and should chalk out a united programme with other trade union organisations taking into account the relevant factors indicated in the foregoing.

.....

(ECONOMIC SURVEY, 1986-87, 1988-89)

The Economic Survey, 1988-89 admitted that "The growing incidence of sickness is one of the most serious problems being faced by the industrial sector in India today." The Economic Survey further stated while reviewing the overall economic situation in 1988-89, that "the other trend (besides stagnation in growth of employment) which seriously threatens the prospects of future industrial growth is the increasing incidence of industrial sickness."

Even then, no effective steps have yet been taken by the Government either to stem the growing incidence of sickness or to rehabilitate the closed units.

In the category of non-SSI sick units, engineering and textile industries accounted for about 61 percent of the total credit outstanding and 47 percent of the total number of sick units. Among the states, Maharashtra and West Bengal accounted for about 45 percent of the total credit outstanding and 36 percent of the number of total units in the category of non-SSI sick units.

The Board for Industrial and Financial Reconstruction (BIFR), set up under the Sick Industrial Companies (Special Provisions) Act, 1985, became operational on 15th May 1987. Even according to the Board, it can do very little in the matter of revival of sick units.

1. @ Figures below 500

2. Figures may not add up to row and column totals due to rounding off.

According to the latest figures available with the Labour Ministry, number of jobseekers on the live register stood at about 262.70 lakhs in 1985 which had swelled upto 3.0 lakhs by the end of 1988.

The total number of vacancies as intimated to the Employment Exchanges had, however fallen from about 6.75 lakhs in 1985 to a little over 5.13 lakhs in 1988. The total number of vacancies recorded in 1986 was 6.23 lakhs which declined marginally to 6.00 lakhs in 1987.

On the other hand, the placements recorded were 3.88 lakhs in 1985 which continuously declined to 3.51 lakhs in 1986, 3.34 lakhs in 1987 and 3.28 lakhs in 1988. The decline was steep in both public and private sectors.

.....

(Report of the Ministry of Labour, 1988-89)

----- PLACEMENTS THROUGH EMPLOYMENT EXCHANGES -----

		1985	1986	1987	1988
All - India (in lakhs)	-	3.88	3.51	3.34	3.28
Maharashtra (in '000)	-	42.9	N.A	N.A.	29.00
Tamilnadu (in '000)	-	52.6	N.A	45	50
West Bengal (in '000)	-	13.1	9.4	10.1	12.9
Karnataka (in '000)	-	14.8	9.3	8.8	8.0
Kerala (in '000)	-	13.7	15.3	14.1	15.8
Bihar (in '000)	-	11.2	22.7	20.5	18.7
Uttar Pradesh (in '000)	-	30.2	31.8	28.0	29.1

The Government always argues that not all those registering with employment exchanges are unemployed and that employed persons seek better employment through employment exchanges. The trend of placements does not, however, prove the contention of the Government. Had it been so, the number of jobseekers in the live register would have been much more.

.....

 CONSUMER PRICE INDEX FOR INDUSTRIAL WORKERS

	Base 1960=100						
	1983	1984	1985	1986	1987	1988	1989
January	495	563	588	629	688	753	813 (165)
February	500	56	585	633	686	749	813 (165)
March	502	558	586	638	686	753	818 (166)
April	508	559	594	643	691	763	
May	521	562	600	651	703	771	
June	533	574	606	658	715	782	
July	541	585	615	668	724	795	
August	549	586	618	672	736	800	
September	554	589	619	676	745	806	
October	558	592	625	685	750	823	(167)
November	561	599	630	692	755	828	(168)
December	559	588	630	688	752	818	(166)
Monthly Average	532	576	608	661	719	787	

(Figures in brackets are of 1982 base introduced in October '88 and linking factor is 4.93 for conversion to 1960 base)

It will be seen that fluctuations in the index during the months of November, Dec. 1988 and next Jan. '89 have been much more sharp than in any of the previous years. This is the direct result of the introduction of the new series with 1982 as base.

.....

PROPOSED AMENDMENTS TO AITUC CONSTITUTION

I

The following amendment is proposed in place of clause 17 of the Constitution:-

" For the General or Special Session of the AITUC the total number of delegates shall be 1200 to be distributed pro-rata as per the membership of each state.

The General Council/Executive Committee of each state shall allocate delegates in the manner it deems fit, keeping in view the importance of industries, their membership, small industries, the unorganised sectors and the various regions."

proposed by AITUC Sectt.

II.

The following provision be added in the constitution at a suitable place, preferably at 'aims and objectives':

" At all India level centrally and also at state levels through the state committees of All India Trade Union Congress, for educational activities, particularly for conducting Trade Union classes for the members of the affiliated trade unions, the AITUC will take grants-in-aid from the Central Government Workers' Education Board and from such other institutions as and when necessary."

Proposed by Comrade C.R. Bakshi.

III.

- 1) Total Delegates should not exceed 1500 including Invitees, Veterans, Observers, Fraternalists etc.
- 2) Total number of Delegates etc. are to be fixed up on the basis of Membership of Unions/Federations by the Working Committee of AITUC/General Council and distributions of delegates will be made by the Working Committee/General Council among the State TUC/Federations (Central) on the basis of their respective membership.
- 3) Few Delegates for the Central functions and comrades abroad are to be reserved by the Working Committee.
- 4) State TUCs will have to distribute their delegates (given by the Centre) among the District Councils/State

Federations and State-basis Central Unions on the basis of their membership.

- 5) Elections of the All India Delegates will be made by the respective District Conferences/Extended District Council Meetings of representatives' meetings of the Districts. Federation or State-level Unions will elect their delegates by their Annual Conferences or by Extended meetings of the Ex. Comrades.
- 6) State Working Committees will conduct all these elections and in extra-ordinary cases Working Committee may elect State Delegates.
- 7) In the Conference year, Affiliation fees for the previous year or years must be cleared within May 31, without fail upon which number of delegates will be fixed up. Affiliation fees must not be accepted during the period of AITUC Session. This method is to be followed strictly. At first, it may create some difficulties, but ultimately, while process will start, there will be no difficulties.
- 8) Disbursement of Affiliation fees:

For the regular functionings of District Councils, Organisational importance should be given in all respects including disbursement of Affiliation fees as follows:

AITUC Centre	;	30% of deposited Affiliation fees.
State TUCs	;	30% of deposited Affiliation fees.
District Councils	;	40% of deposited Affiliation fees.

All English-knowing or Hindi-knowing Unions must deposit subscriptions (Annual) for TUR or AITUC ^{SAMVAD} along with Affiliation fees.

Re: Constitution of Working Committee:

Every year 20% of the Working Committee members will retire and will be substituted by new members for the purpose of covering generation gaps"

Proposed by Comrade Gobin Karar

IV

In clause 1, after the end of the para a new para as hereunder to be incorporated.

Emblem: "The emblem of the AITUC shall be crossed hammer and sickle in white: against a red background with a circular inscription in white "ALL INDIA TRADE UNION CONGRESS"

or a translated version of the same in any Indian regional language."

Flag 'Flag of the AITUC shall be red flag of which length shall be one-and-a-half times its width. At the left side a vertical inscription of 'AITUC' in white, and in the centre of the remaining space a crossed hammer and sickle in white shall be there."

1. After 2 (g) add a new (h) and (i) as follows:

"h) To fight Neo-colonialist offensive of Imperialism in all spheres of our national life, to establish for a New International Economic Order and also for a New International Information & Communication Order."

i) To fight against the Imperialist policy of Destabilisation, to fight against separatism, religious fundamentalism, terrorism, casteism which are threatening our country's national integrity.

3. In clause 8 (page 8) a new sub-clause (vi) should be incorporated as follows

"(vi) District bodies under the direct guidance and control of state bodies."

4. In page 15, after the sub-Title "State Committees" Cl.30-a), b), c), d); a new Sub-Title entitled "District Committees" along with new clause number should be as follows:

a) "Affiliated unions in every district shall form a district committee of the AITUC under the direct guidance and control of the State Committee. Every Union in the district, affiliated to the AITUC shall automatically form a part of the district committee. The district committee shall manage their affairs according to rules to be framed by the state committees, which must not contravene the spirit of the AITUC constitution."

b) Out of the collection of Affiliation fees from unions the district committees shall be paid forty percent.

c) Share of Levy as fixed by the state committees shall be 50 percent for the respective district committees.

d) Cl.30 (d) shall also be applicable in the case of district committees.

e) All District Committees elected from the conference of the affiliated unions of the district under the guidance and control of the state committees, may or may not constitute two tiers of committees, e.g.

i) District Council (if necessary) consisting representatives from all unions of the district.

ii) District Committee consisting of the following Office bearers as follows:

* One President

* One Working President (if necessary)

* Not more than 7 Vice-Presidents

* One General Secretary

* Not more than 7 Secretaries

* Not more than 2 Office Secretaries

* One Treasurer

* Not more than 2 Assistant Treasurers (if necessary)

f) All District Committees shall be entitled and empowered automatically, to conduct Trade Union Education Camps with all kinds of assistance of the Central Board For Workers' Education, 1400 West High Court Road, Gokulpeth, Nagpur - 10.

No special permission from State Committees by the district committees shall be necessary for applying to Central Board for Workers' Education. District Committees shall directly apply, plan and implement T.U. education camps. Financial transactions with C.B.W.E. and finalisation of accounts with them will be done by the district committees.

5. In Page 15, Clause 30 (b) replace the word 'fifty' by 'forty'.

6. In Page 10, Clause 17(a) to (d) delete, and replace as hereunder:

17, (a) For a serious, in-depth and thorough discussion and debate on the agenda of the General or Special Session of the AITUC, number of elected delegates for the said sessions should not go beyond one thousand in case of General Session and five hundred in case of special session of the AITUC.

The basis of exact representation of delegates from respective states and/or union territories shall be fixed by the General Council of the AITUC who convene such session. Formal convenor of the sessions both 'General' and 'Special' shall be General Secretary.

- a) In fixing the basis of delegation the G.C. shall allot a certain number of delegates to be elected from the state conference and also from the District conferences along with the number of delegations to be elected by different unions.
All unions/federations having paid membership above 5000 shall be given direct representation but below 5000 all are to be represented by State/District bodies. The concrete details to be worked out by General Council of AITUC.
- b) Delegate's cards will be issued on production of a certificate of election by the Secretary of the State/Union territory committee and or unions on payment of delegate fees to be fixed by the G.C. before such sessions.
- c) To ascertain the number of delegates which States/ Union territories/Districts/Unions are entitled to send to the General or Special Session of the AITUC, the basis shall be the number of paying members existing on the register of the union and deposited to the district and state/union territory committees of the AITUC for the year prior to the session of AITUC, duly certified by the auditor.
- d) Before the General and/or special session of the AITUC all state and District Committees must convene their respective conferences and such conference, must conclude atleast before 15 days from the date of commencement of the General/Special Session of the AITUC. But all district conferences must be made complete before the commencement of the state conferences.

Agenda of such State/District Conferences shall be:

- (i) General Secretary's Report
- (ii) Statement of Accounts
- (iii) By-laws Framing or Amendment
- (iv) Programme for the future.
- (v) Miscellaneous.

Proposed by Comrade Amal Dutta.
